Top Skills

Enterprise Data Warehouses (EDW)
Retrieval-Augmented Generation (RAG)
Snowflake Cloud

Certifications

Fellowship Project Management Internship Program
Claude Certified Architect - Foundations
Certificate of completion: Introduction to Claude Cowork
Certificate of completion: AI Fluency for nonprofits

Ganesh Sundaresan

AI & Data Engineering | GenAI • Agentic AI • Snowflake Native Apps • Databricks • Analytics Engineering • dbt • Snowflake • Forecasting • Data Platforms
Liverpool, England, United Kingdom

Summary

Senior Data Engineer with 8+ years (8 yrs 3 mos) of experience building scalable data platforms, AI-enabled solutions, and high-impact analytics products across e-commerce and fundraising domains. I specialize in Snowflake, Databricks, SQL, Python, dbt, Looker, and modern BI tooling, with a strong focus on solving real business problems through data, automation, and intelligent design. I worked as Accelerator Lead for the AI Incubation Center (Decision Minds, Pondicherry), where I guided teams of 15+ engineers in designing, prototyping, and deploying AI-driven applications. I worked extensively with Snowflake Native Apps, Databricks Apps, and AI agents, using agentic IDEs to automate API integrations, data lineage resolution, code generation, and workflow orchestration — cutting engineering effort by ~60% and delivery time by 40–55%. At GoFundMe, I apply advanced analytics engineering to optimize donor funnels, checkout behavior, GDV metrics, and user engagement models. I design efficient, scalable dbt pipelines using rolling metrics, lag functions, and domain-oriented modeling patterns, and led the migration of 100+ Looker dashboards from Redshift to Snowflake (45–70% faster, ~30% lower compute cost). My automated data-quality frameworks cut data incidents 80%+ and lifted reporting accuracy to 99.6%, supporting product, finance, and strategy teams with reliable data. Core Skills: Data Engineering – Snowflake (Certified), Databricks, AWS, BigQuery, Impala, Big DataAnalytics Engineering – dbt, SQL optimization, metric design, data modelingBusiness Intelligence – Looker, LookML, Tableau, Power BI, GDSAI & Automation – AI agents, Snowflake Cortex, Databricks Apps, agentic IDEs, API automationProgramming – Python, SQL, JavaScriptWorkflow & Leadership – Agile, Lean, cross-functional collaboration, accelerator leadership Education: MSc Data Science and Communications, University of Liverpool (2026–27, expected) PG Diploma in Data Science & ML, Times University PGDM, IMT Ghaziabad B.E.,

Anna University Achievements: Snowflake Certified · Accelerator Lead – AI Incubation Center · ACM ICPC 2015 Regionalist GitHub: github.com/GaneshSDM Hobbies: Cricket, videography, photo/video editing.

Experience

Decision Minds
Senior Data Engineer
April 2024 - September 2026 (2 years 6 months)
Bengaluru

AI Incubation Lead | Decision Minds | Pondicherry, India

• Spearheaded the end-to-end design, development, and launch of PerfScope, Decision Minds' first approved Snowflake Marketplace application, leading the product from concept and architecture through engineering, validation, Native App packaging, and Marketplace approval.

• Built PerfScope as a Snowflake-native query performance monitoring solution that identifies and ranks high-cost/poorly performing queries using execution time, credits, bytes scanned, spillage, queuing, warehouse utilization, and user activity.

• Led 3+ cross-functional teams (15+ engineers) delivering enterprise applications across Data, Analytics, AI, and GenAI.

• Architected and launched Snowflake Native Apps and Databricks Apps, reducing deployment timelines by 40–55%.

• Built agentic AI frameworks automating data lineage, API orchestration, testing, and engineering validation, reducing manual effort ~60%.

• Delivered enterprise GenAI solutions across RAG, LLM workflows, domain-specific AI, Snowflake Cortex, and multi-agent systems.

• Established reusable AI accelerators and engineering frameworks supporting AI adoption across 10+ concurrent projects.

Senior Data Engineer / Analytics Engineer | GoFundMe

• Led migration of 100+ Looker dashboards from Redshift to Snowflake, improving performance 45–70% and reducing compute costs ~30%.

• Built analytics pipelines processing 10M+ daily events for executive, revenue, and operational analytics.

• Developed ARIMA forecasting for donation volume, fundraiser conversion, and campaign trends.

• Architected an 18-layer marketing analytics platform using dbt, Snowflake, and LookML for attribution, funnel analysis, and forecasting.

• Built automated Python data-quality frameworks, reducing production incidents 80%+, and redesigned donor models achieving 99.6% reporting accuracy.

• Developed a 19-layer cohort analytics framework supporting retention, lifecycle, and financial analysis.

GoFundMe Pro
Data Warehouse Consultant
April 2024 - September 2026 (2 years 6 months)

Income
Lead Data Engineer / Technical Data Steward
June 2023 - March 2024 (10 months)
Remote

Data Platform Engineering

Built enterprise-grade data models and BI solutions on AWS Glue, S3, Athena, Cloudera, and PgAdmin.
Owned the full analytics lifecycle end-to-end — requirements, solution architecture, implementation, delivery, and stakeholder sign-off.
Improved pipeline reliability, scalability, and query performance across large-scale analytical workloads.

Governance & Self-Service

Architected secure analytics infrastructure with controlled access and enterprise-grade governance.

Enabled self-service analytics, accelerating data-driven decision-making across engineering and business teams.
Built internal automation frameworks, cutting manual ops work and reducing data-delivery time ~30%.

Craftner Inc
Lead Data Engineer
June 2023 - March 2024 (10 months)
Remote

Tata Consultancy Services
Senior Engineer - BFS ANZ - Power Platform
January 2023 - April 2023 (4 months)
Chennai

BI Delivery & Stakeholder Engagement

Led design and delivery of interactive Power BI dashboards and executive reports for BFS ANZ stakeholders.
Partnered with business and technical leads to gather requirements, define KPIs, and translate needs into scalable BI solutions.
Improved reporting adoption and decision-making velocity across leadership and operational teams.

Modeling & Performance

Designed efficient data models and ETL pipelines across relational and cloud sources, ensuring high accuracy and data integrity.
Developed advanced DAX measures, filters, and role-based security controls for customized, secure reporting.
Streamlined data refresh workflows and optimized query efficiency, cutting dashboard load times and refresh latency.

Cartograph
3 years 3 months

Data Analyst
December 2021 - November 2022 (1 year)
Remote

Built and maintained interactive dashboards tracking sales performance, advertising effectiveness, and customer behavior.

Automated ingestion, collection, and reporting workflows on Google BigQuery, SQL, and App Scripts — improving accuracy, cutting manual effort, and accelerating insight delivery.

Trained HR and recruitment teams on self-service reporting using Tableau, Power BI, and SQL.

Ran deep-dive analyses to surface trends, anomalies, and growth opportunities for brand and senior stakeholders.

Partnered with marketing, HR, and operations teams to gather requirements and deliver measurable, decision-ready visualizations.

Associate Data Analyst

May 2021 - December 2021 (8 months)

Remote

Designed and implemented automated data analysis workflows, predictive models, and data mining techniques, enabling faster, data-driven decision-making across business functions.

Built and maintained scalable data warehouses and analytical data models, ensuring clean, integrated, and highly reliable datasets to support advanced analytics and reporting.

Applied SQL and statistical analysis techniques to extract insights, identify trends, and optimize operational performance, directly supporting strategic and operational initiatives.

Developed interactive dashboards and executive reports to visualize key metrics and KPIs, driving data-informed decisions across technical and business teams.

Improved data quality and analytics pipeline efficiency through automation, standardization, and best-practice data modeling, increasing organizational reliability and speed of delivery.

Skills: SQL · Predictive Modeling · Data Warehousing · Data Mining · Statistical Analysis · Data Visualization · Automation · Dashboarding

Associate Business Analyst

September 2019 - April 2021 (1 year 8 months)

Remote

Developed and maintained high-performance dashboards and visualizations for sales and revenue analysis, enabling leadership teams to track performance, identify trends, and support data-driven business strategy.

Partnered with senior leadership and brand managers to deliver ad-hoc analytical dashboards and support client onboarding with performance-optimized, scalable reporting solutions.
Worked extensively with Snowflake and enterprise data warehouses to update, maintain, and validate datasets, ensuring high data integrity and reporting accuracy.
Performed data wrangling and transformation using Tableau Prep, Excel, and related tools, improving data usability, consistency, and reporting efficiency.
Trained and mentored junior associates on data cleaning, automation techniques, and analytics best practices, while partnering with senior analysts to ensure on-time, high-quality project delivery.
Skills: Snowflake · Tableau · Tableau Prep · Excel · Data Wrangling · Dashboard Development · Stakeholder Management · Automation

BYJU'S
Business Development Associate
April 2019 - July 2019 (4 months)
Avanashi, Tamil Nadu, India

Amazon
Catalog Specialist
August 2017 - March 2019 (1 year 8 months)
Chennai

Optimized 1,000+ product listings for the Amazon US marketplace, improving catalog quality, search relevance, and compliance while managing daily task allocation for a multi-member catalog optimization team.

Generated inventory health and stock maintenance reports supporting demand planning and replenishment decisions, and built Excel-based macros and automation workflows that reduced manual reporting effort by 30–40%.

Served as the primary point of contact for stakeholder queries, issue resolution, and escalations, consistently meeting SLAs and earning multiple recognitions including “First Among Equals,” “Customer Delight,” and “Team Leadership.”

Identified process bottlenecks and operational inefficiencies, implemented lean improvements, and eliminated non–value-added steps, resulting in measurable gains in operational efficiency and turnaround time.

Demonstrated strong ownership, bias for action, and customer obsession, aligning closely with business priorities and team goals.

Skills: Excel (Advanced · Macros · Automation) · Inventory Analysis · Process Improvement · Stakeholder Management · Team Coordination · Operational Reporting

Education

University of Liverpool

Master of Science, Data Science and Communications · (September 2026 - September 2027)

Institute of Management Technology, Ghaziabad

Postgraduate Degree, Business Administration and Management, General · (February 2022 - February 2023)

TimesPro - Executive Education

Postgraduate Diploma, Machine Learning and Artificial Intelligence · (2019 - 2019)

Sri Krishna Institute Of Technology

Bachelor's degree, Civil Engineering · (2013 - 2017)
